

VOCATIONAL TRAINING CENTER, MEDAN

INDONESIA

Client: Indonesian Ministry of Labour operates 301 vocational training centres nationwide. The **Place:** Medan, Indonesia vocational training centre in Medan, North Sumatra is being upgraded through a **Project:** by east Austrian international projects GmbH. In this project, the entire digital **Photos:** Timur Uzunoglu infrastructure (learning management system via e-learning and digital school administration) as well as the physical infrastructure (renovation of carpentry workshop and new construction of tourism school, training kitchen, hotel reception and carpentry training workshop) will be delivered/built and put into operation. VTC Medan will thus offer 496 positions per year for trainees from January 2023 and make them "fit for maritime tourism and maritime carpentry". To ensure that the trained cooks, waiters, receptionists and carpenters can immediately put the theoretical and practical skills they have learned into practice, the tried and tested Austrian dual training system (theory and practice combined with digital teaching and learning) was taken as a model.

On behalf of bit media e-solutions, convex ZT GmbH was responsible for reviewing the Indonesian implementation planning as well as for quality assurance of the construction work on site.
