

CCPP PETROBRAZI

ROMANIA

Overview: Petrobrazî Combined Cycle Heat and Power Plant (CCHP) is located in the municipality of Petrobrazî, Romania, situated about 4 km south east of town of Ploiesti, about 40 km to the north of Bucharest. The site of the powerplant will be within the area of the Petrobrazî Refinery. The power export capacity will be in the order of 860 MW. Fuel oil is considered as the main fuel.

2011

The feasibility study and tender for the powerplant was done by Pöyry Energy GmbH. On behalf of Pöyry Energy GmbH, parts of the layout design and the complete civil works permit application was carried out by convex ZT GmbH in co-operation with our local partner, ISPE (G. Schönsperger). Additionally, an architectural and colour concept was developed (A. Wagner) and presented by means of 3-D renderings and a movie (G. Schönsperger).
