

FEDERAL HOSPITAL FELDBACH, DEPARTMENT FOR NEUROLOGY

AUSTRIA

With the opening of the department for neurology at the Federal Hospital Feldbach, a trans-regional neurological specialist care for east-styrian patients is provided. The extension of the second storey in the southern part of the hospital was a first step of further extension works. Until to its final use, in these rooms, the neurological ambulance will be situated.

On behalf of KAGES, convex ZT GmbH was responsible for the structural design of the extension/built-up of the second storey. The load bearing structure of the extension are braced steelwork frames, the slabs are carried out in cross-laminated timber (KLH).
