

FEDERAL HOSPITAL FÜRSTENFELD, EXTENSION AUSTRIA

The third- and last phase of construction of the future-oriented modernization of Fürstenfelder Hospital is being carried out. The project involves the additional construction in the eastern part of the hospital and the adaptation of the ground floor in the eastern part of the old building. The additional construction will house a palliative care unit with eight beds and acute geriatrics/remobilization station with 24 beds.

On behalf of KAGES, convex ZT GmbH is responsible for the structural design.
