

PAPER MILL STETI, ECOVANTAGE PROJECT, MONDI CZECH REPUBLIC

The paper factory in Steti/CZ was built in 1949 and was the largest paper factory in Central Europe at that time. The PM1 paper machine is now being modernised and expanded as part of the EcoVantage project. In the project, the PM1 Hall will be extensively refurbished and components such as winders, reelers, press, refiners and main drives will be replaced by new ones. The completely refurbished PM1 paper machine will go into operation at the beginning of 2021.

On behalf of mondi Bags Steti a.s., convex ZT GmbH has been responsible for the detail design of phase I, and the basic- and detail design of phase II as well as with construction supervision and project management services for the EcoVantage project.
