

PAPER MILL BRUCK AN DER MUR, NORSKE SKOG AUSTRIA

Norske Skog is investing another 99.5 million euros in new plants and conversions in Bruck an der Mur over the next few years. The existing PM 3 paper machine will be converted from the current 125,000 tonnes of newsprint to 210,000 tonnes of recycled containerboard. Final investment decisions are planned for the first half of 2021, with packaging paper production starting in the first half of 2023. During the conversion phase, the machines will be shut down for three months.

On behalf of Norske Skog Bruck GmbH, convex ZT GmbH is responsible for the tender and execution design for the construction, domestic services and small power and electro works.
