

CCPP MAINZ-WIESBADEN

GERMANY

Kraftwerke Mainz-Wiesbaden AG operates a power plant for generating electricity and steam at the Ingelheimer Aue site in Mainz, which consists of five individual power plants and has been approved for a plant capacity of 2551 MW. This also includes Power Plant 4, which has not yet been built. Dornier Group was commissioned to carry out design and building permit planning for the possible construction and operation of Power Plant 4 in a future-proof design, as well as for highly efficient and highly flexible electricity generation for base, medium, and peak loads.

On behalf of Dornier Group, convex ZT GmbH prepared the construction design and building permit design, as well as the construction tender.
