

FLUE GAS DESULPHURISATION PLANT, TIMISOARA ROMANIA

AE&E has received an order from CET-Sud for the supply of a turnkey flue gas desulphurisation system (dry absorption) for the operational thermal power plant in Timisoara.

On behalf of AE&E, convex ZT GmbH is carrying out the entire construction permit and civil works detail design and site supervision works. The heavy structures of the plant are founded on \varnothing 0,6 m in-situ cast drilled reinforced concrete piles. The civil design had to follow both the European and the Romanian codes and regulations, in particular the seismic ones.

Owner:

CET-Sud/Timisoara Municipality
