A PASSION FOR ENGINEERING

RENDERINGS

WORLDWIDE

The external appearance of industrial plants is an important issue especially during the approval process. Our interdisciplinary team of mechanical engineers, civil engineers and architects can create visualizations of industrial plants in early project phases, both for the exterior- as well as for the interior of the plant.

Through our experience and our project database of more than 60 realized power plant projects (thermal power plants, hydroelectric power plants and wind power plants) and a variety of industrial projects, we are able to create photorealistic visualizations in a short time.

Current reference projects
Hydropowerplant Mestia 1 & 2, Georgia (2017)

Renderings of:
Gas fired power plants
Coal fired power plants
Biomass power plants
Hydroelectric power plants
