

15 COUNTY HOSPITALS

ROMANIA

The Romanian Ministry of Health is conducting feasibility studies for the revitalisation of 15 hospitals in different regions of Romania. The main task is the assessment of the current condition of the hospitals, the check of their compliance with European codes and regulations and the preparation of revitalisation proposals.

The feasibility studies are carried out by the consortium VAMED, Vienna; convex ZT GmbH, Graz; ISPE, Bucharest and ASIX, Bucharest under the leadership of VAMED, Vienna. The very short execution period of three months requires a very detailed and effective project planning.
